EDUCATION

Arab Academy for Science, Technology & Maritime Transport (AASTMT) Alexandria, Egypt
B.Sc. in Computer Engineering; CGPA: 3.98/4.00; ranked 2nd in class Sep 2022 – Feb 2027 (expected)
• **Relevant coursework:** Data Structures & Algorithms, Computing Algorithms, Distributed & Parallel Systems, Database Systems, Object-Oriented Programming, Cybersecurity, Probability & Statistics, Artificial Intelligence
• **Internship availability:** Full time for 13–17 weeks, starting in May, June, or July 2027

TECHNICAL SKILLS

Programming Languages: Python, C++, C, Java, JavaScript, TypeScript, Bash, SQL
Software Engineering: REST APIs, FastAPI, PostgreSQL, Git, GitHub Actions, CI/CD
Systems: Linux/Unix, networking, socket programming, multithreading, distributed systems
Cloud & DevOps: AWS (EC2, ECR, S3, RDS, IAM), Azure, Docker, Kubernetes
Algorithms: Data structures, graph algorithms, dynamic programming, complexity analysis, distributed systems

WORK EXPERIENCE

Digital Egypt Pioneers Initiative Jun 2025 – Dec 2025
Machine Learning Engineer Intern 180-hour applied program
• Built and integrated **Python** components for data processing, inference, evaluation, and **Azure deployment** during a **180-hour** applied engineering program
• Collaborated in a project **team** to design, test, debug, and release a real-time facial-recognition application, achieving **98% recognition accuracy** with concurrent multi-face detection
• Implemented the embedding and recognition pipeline, packaged the application with **Docker**, and used Git-based workflows to coordinate integration and milestone delivery

PROJECTS

RAG Knowledge Base Chatbot — Search & Backend System [GitHub](#) | [Live Demo](#)
• Developed and deployed a containerized **FastAPI** search service on AWS EC2, combining BM25 and FAISS retrieval behind REST endpoints
• Instrumented request execution with **LangSmith tracing**, providing end-to-end observability for latency analysis, failure diagnosis, and retrieval debugging

Premier League Predictor — Automated Data & Deployment System [GitHub](#)
• Engineered reproducible **Python** pipelines for data ingestion, evaluation, and deployment using ZenML, MLflow, **PostgreSQL**, and AWS S3
• Containerized the service with **Docker**, deployed it through ECR to EC2, and automated weekly monitoring jobs with cron to detect live-accuracy regressions and trigger retraining below a defined threshold

FPL Vision — Cloud-Hosted Data Service [GitHub](#)
• Built a live-data pipeline that consumed REST API records for **700+ players** across 20 teams, persisted gameweek results in **PostgreSQL**, and exposed them through a web application
• Packaged the service with **Docker**, deployed it on Azure App Service, and automated build-and-release workflows with GitHub Actions **CI/CD**

LAN Chat Room — Concurrent Client–Server Application [GitHub](#)
• Engineered a **Python client–server networking** application for text, voice, and video communication, using **multithreading** to coordinate up to **10 concurrent users** and responsive media switching

VOLUNTEER EXPERIENCE

AAST Competitive Programming Club Sep 2025 – Present
Competitive Programming Coach **AASTMT**
• Led 16+ sessions on **algorithms** and structured problem solving, coached 30+ students, produced contest materials, and helped organize timed HackerRank programming events

AWS Student Builder Group at AASTMT Mar 2026 – Present
Core Team Member **AASTMT**
• Helped deliver two cloud-computing workshops and led hands-on instruction for **20+ students** on **AWS** architecture, EC2, S3, RDS, IAM, **scalability**, fault tolerance, and high availability

HONORS & AWARDS

• **ECPC 2026 Finalist:** placed 22nd in qualification and advanced to the Egyptian Collegiate Programming Contest finals, demonstrating consistent performance in teamwork and time-constrained problem solving
• Placed **2nd** in the **2026 HackerRank x CPClub AAST Contest**
• **IEEEExtreme 2024:** top 2% in Egypt and top 20% worldwide among 8,000+ teams in a 24-hour contest
